DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/28/2005 has been entered.
2. To clarify the record at this point in the prosecution, claims 13, 16-21, 23-31, and 69-80 are pending.

Response to Arguments

3. Applicant's arguments, see the above-mentioned submission, with respect to the rejections set-forth in the Office action mailed 8/11/2004 have been fully considered and are persuasive. Brooks (US 3,826,301 A) generally teaches that overspray exists in plasma spraying processes. The overspray collection system of Ivey, however, is designed for liquid paint. There is no suggestion in Ivey or any other prior art reference suggesting that such a device could be successfully utilized to collect molten metal overspray from the plasma spraying method of Matsunaga. Further, when the references are taken as a whole, they can do no better than to suggest that it would be obvious to try such a low pressure overspray removal, which does not render the claims obvious (see MPEP § 2145(X)(B)). The rejections of the claims have been withdrawn.

Allowable Subject Matter

4. Claims 13, 16-21, 23-31, and 69-80 are allowed.

Art Unit: 1762

5. The following is an examiner's statement of reasons for allowance: The closest prior art has been made of record. As noted above, there is no prior art reference or combination of references that teaches or reasonably suggests the claimed method comprising generating a reduced air pressure zone proximate the spray nozzle (said zone moveable with said nozzle) while spraying and moving the spray nozzle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
